Web based GIS for Ponneri Town Panchayat should enable the TP officials to leverage the GIS technology to do effective planning and administration, optimized utilization of resources, etc.. In view of this the present website is an attempt as a proof-of-concept to exhibit the advantages offered by the geo-spatial technologies for the Ponneri Town Panchayat in Tamil Nadu.

Outcome

- Identification of encroachments in map
- Identification of un-assessed properties
- Identification of under taxed properties
- Registration of complaints by Map / Online
- Online Map based Monitoring of utilities:
 - Water supply
 - Street lights
 - Public Toilets
 - Sanitation

II. Home Page

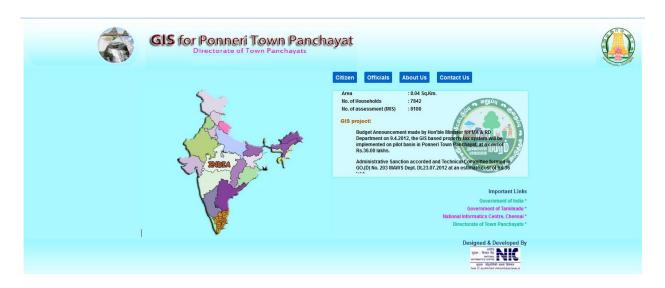

Fig 1: Home Page

This Application has 2 modules

- **Citizen** Maps for General Public to view various spatial features and overlay them over various popular Web Maps like Google, OpenStreetMap etc.
- **II. Official** Highly Interactive, analytical online maps with enriched GIS Functionalities for Town Panchayat Officials and Directorate of Town Panchayat Officials.

III. Citizen Interface

This is for General Public to view the Ponneri Interactive Online Maps which can be superimposed over online web Map Serivces(Google,Open Street Map etc)

Citizen Module has two options 1. View Maps 2. Complaints / Suggestions

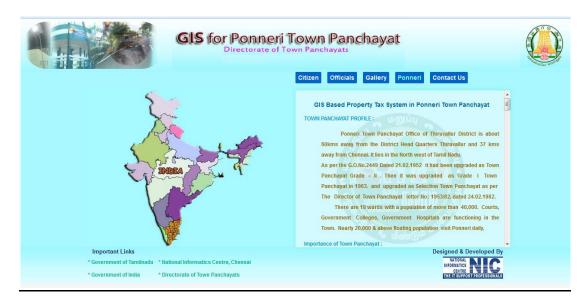

Fig 2: Citizen Interface

1. View Maps

Ward boundary with Google Hybrid map: User may choose any one of the base maps from left side tree view.
